School of the future

Team VENI, Ideathon 2023

Daniel Bušek, David Havel, Patrik Svoboda

Why is AI so important for schools?

Content creation

Less work for teachers

Better learning for students

Clever data collection and analysis

Personalized approach for students

Immediate feedback for students and parents

Existing solutions

Duolingo

Photomath

Thinkmaster Math

ChatGPT

Our solution

Desktop and mobile applications

Platform for students and teachers

Intuitive user interface

Integration into existing school system

Don’t replace teachers, empower them!

Don’t replace teachers, empower them!

Teachers are an important part of education

We can offer them better tools to make their job easier

Content

Data

Follow up

Content creation

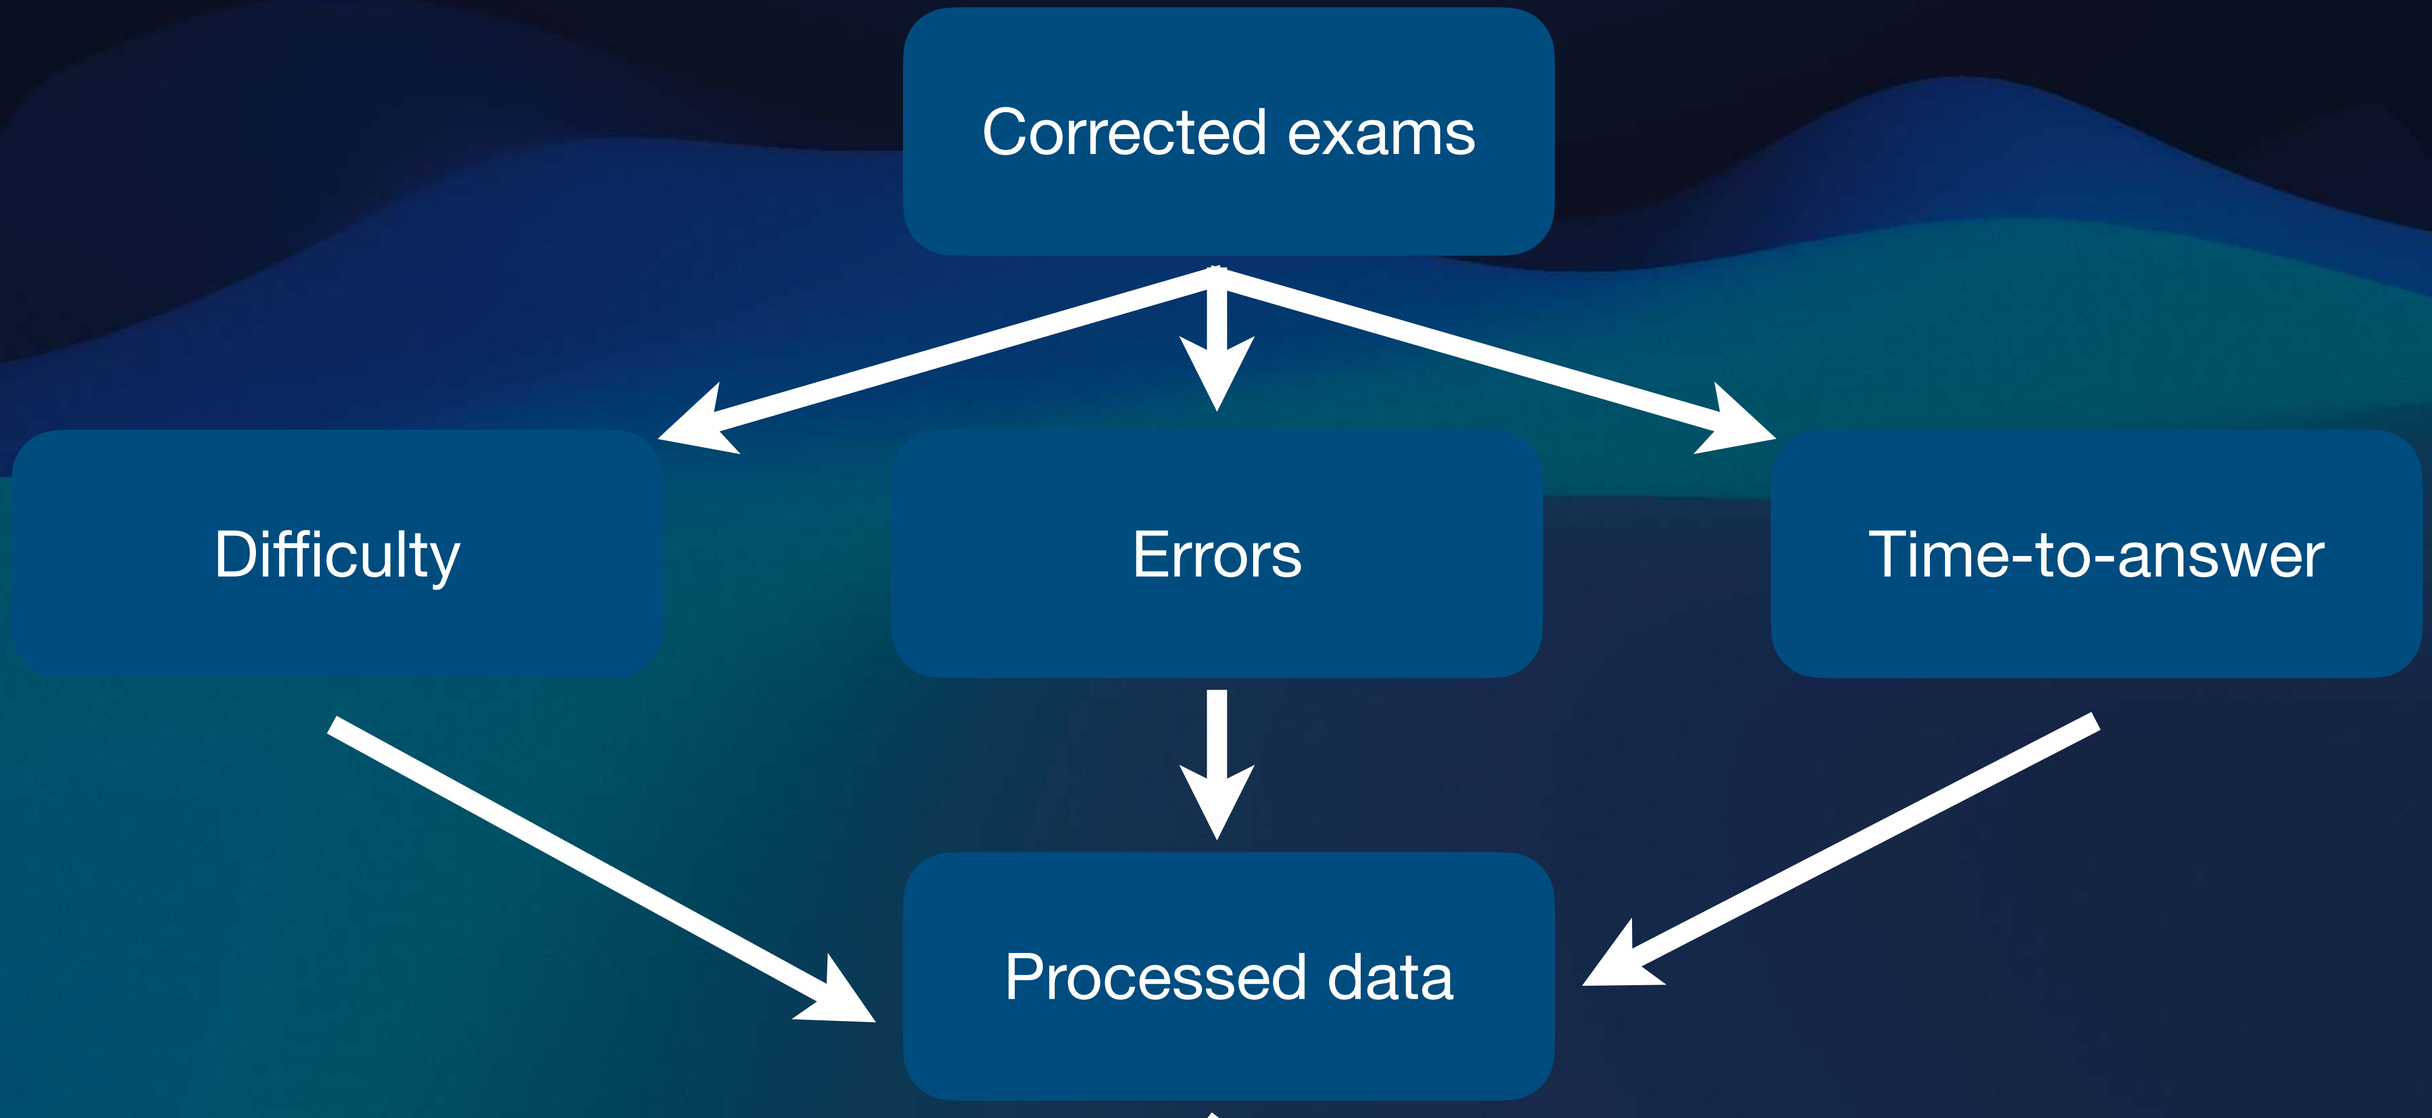
Generated homework, worksheets and exams by AI

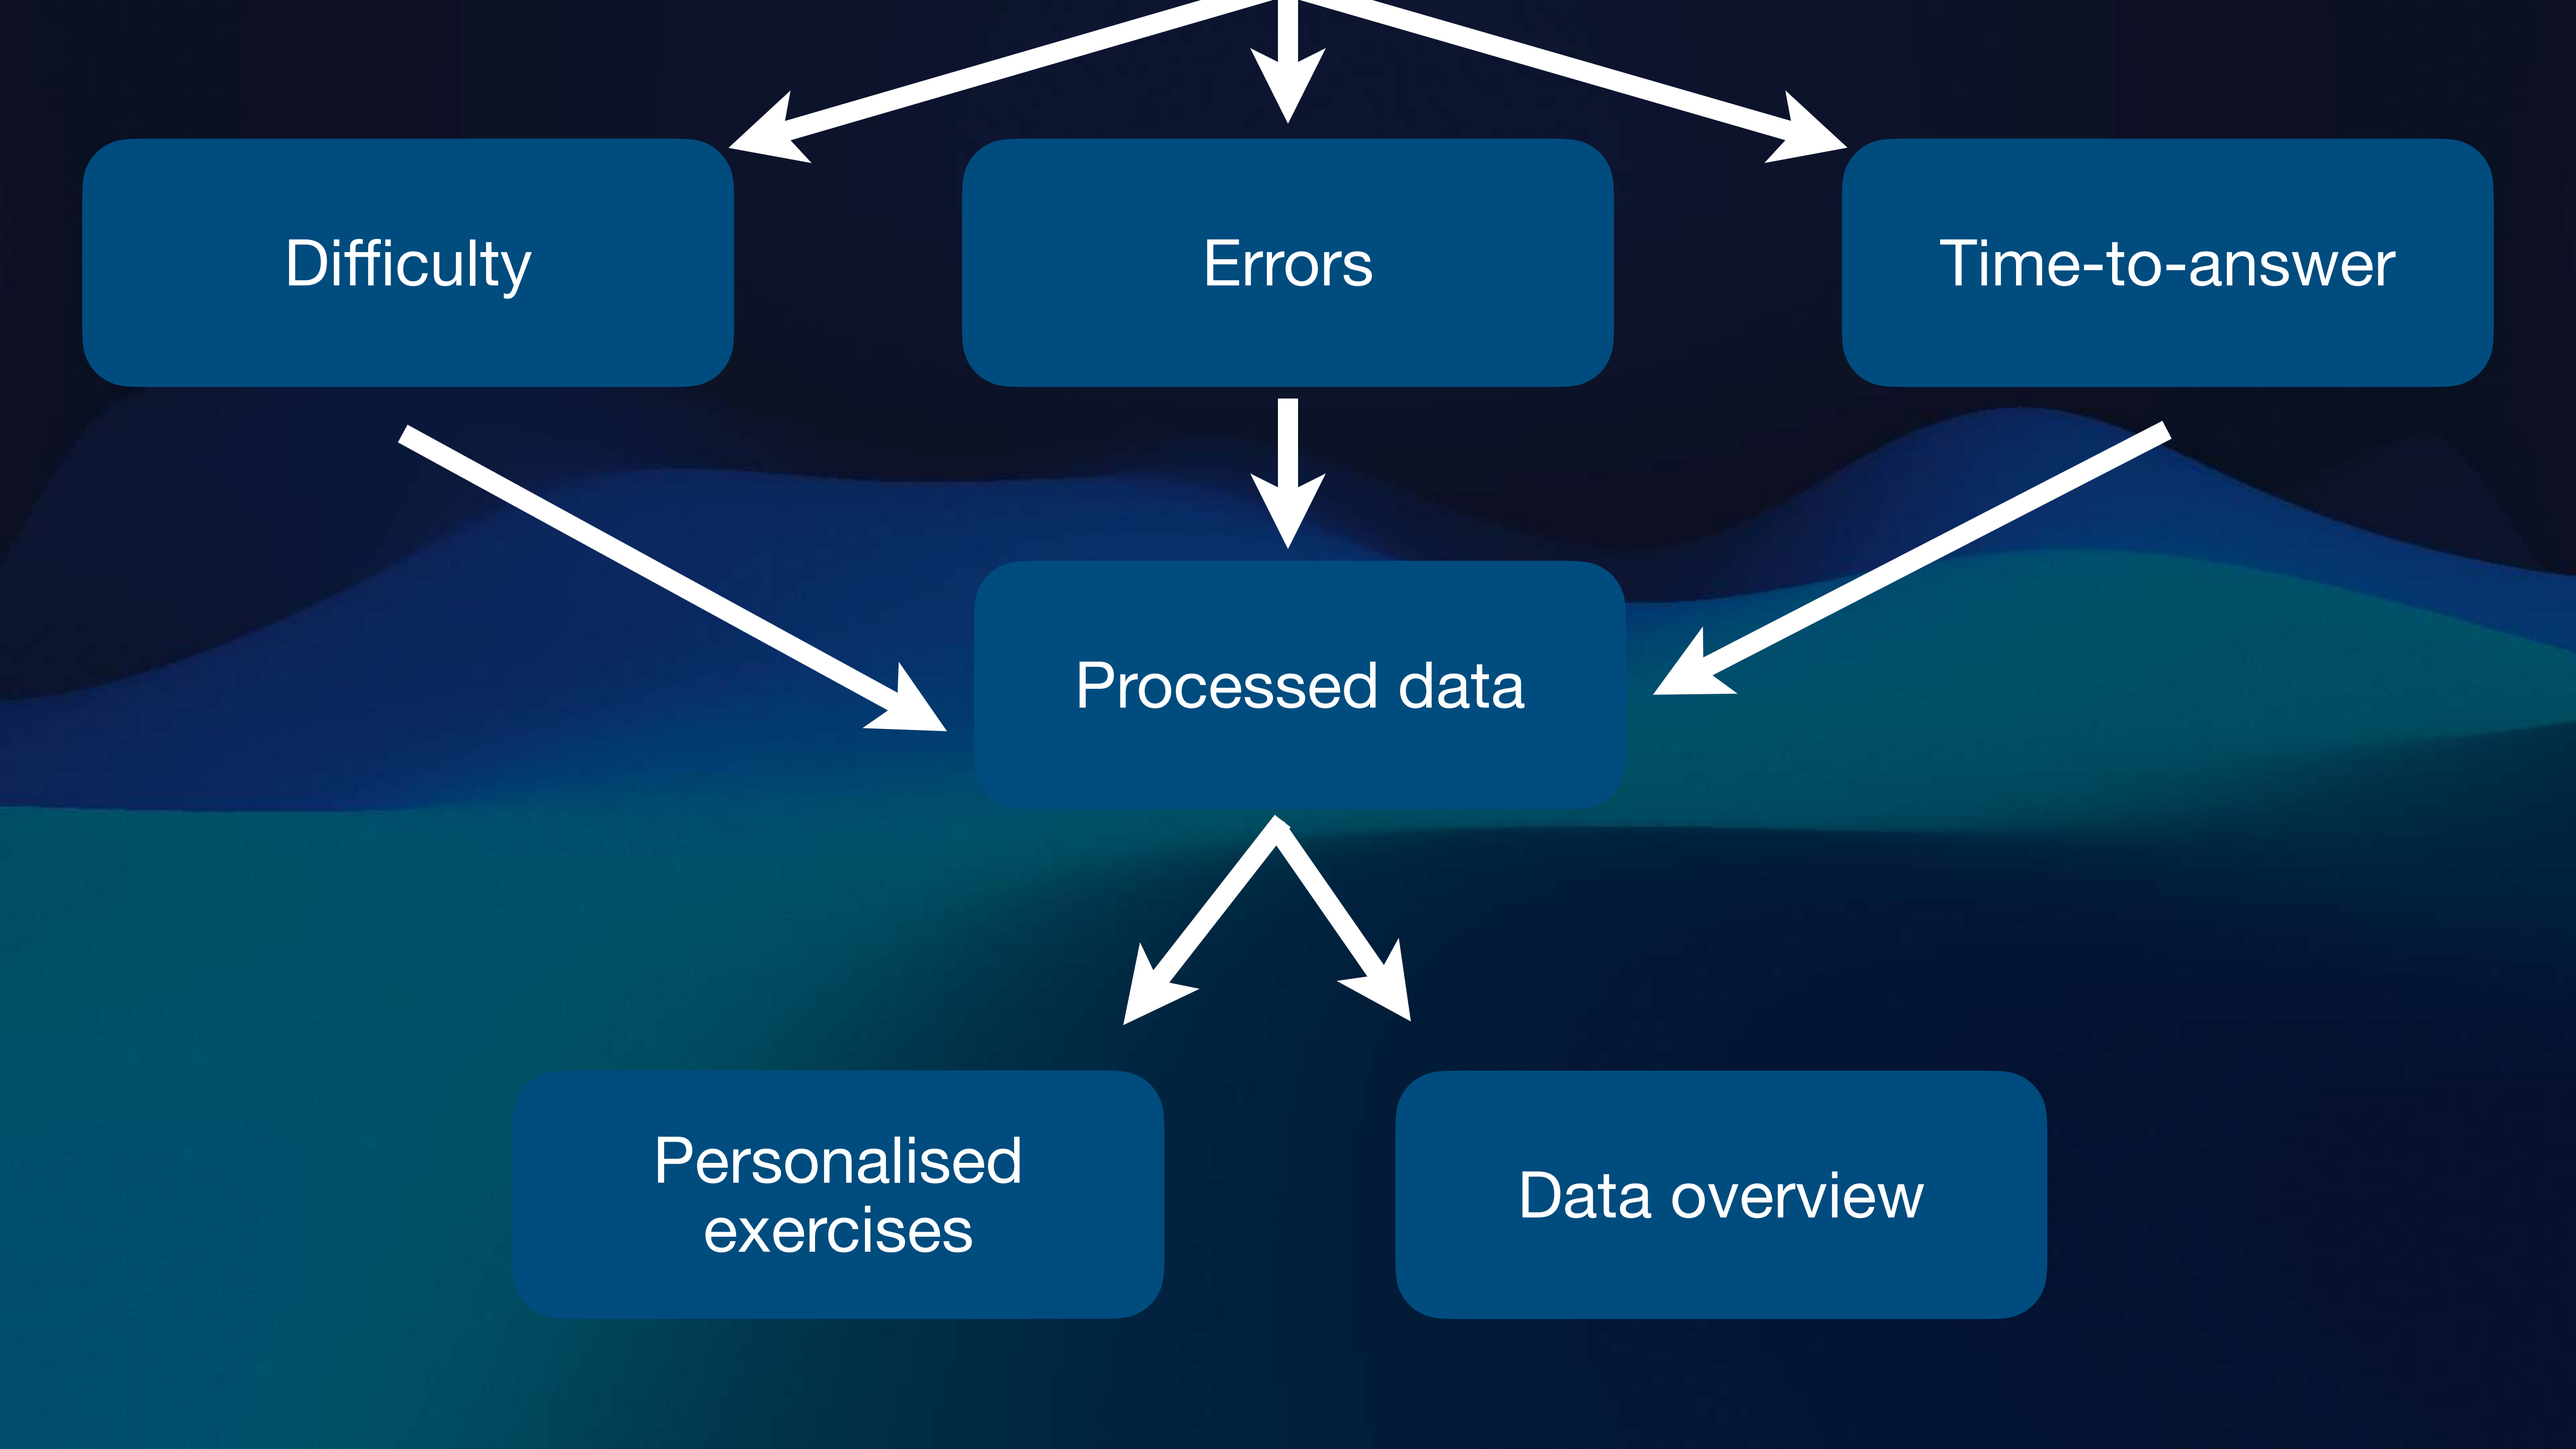
Student’s materials as a basis for exams

Content could be automatically corrected and graded

Feedback for students

Working with data





Difficulty
Errors
Time-to-answer
Processed data
Personalised exercises
Data overview

Advantages

Connected with
school systems

Content
creation

Cost

- AI training is still relatively expensive
  - The industry is quickly improving this
  - Getting easier to start
- Software development
- 3-5 million CZK

Problems

- Getting training data could be difficult
- Privacy is very important
- Teachers need to be taught how to work with it
- Schools need to be onboarded

Thank you for your attention and we’re ready for your questions!
